## Junior Full-stack Developer

A highly organized and disciplined developer with over ten months of experience mastering HTML, CSS, JavaScript, React, and Node.js. Completed over 1,000 hours of training, including three team projects and 43 individual tasks. Eager to leverage acquired knowledge within a team of friendly professionals to participate in projects, related to website and application development.

## Project Experience

### PowerPulse project

[Express.js, Node.js, MongoDB, Mongoose, SCSS, JWT, Webpack, Redux, React] • November, 2023

[PowerPulse](#), [GitHub](#)

- Collaborated with a diverse team to ensure seamless functionality and user experience.
- Created a single-page application for monitoring sports activities and making notes.
- Achieved results, including a 79% accessibility rating on Page Speed Insights and a 98% Lighthouse performance score.

### Cinermania project

[Git, Parcel, HTML5, CSS, JavaScript, AXIOS, Rest API] • Juny, 2023

[Cinermania](#), [GitHub](#)

- Collaborated with a team to create a dynamic, multipage website for movie searching and watching.
- Developed website features with HTML, CSS, JavaScript, and GitHub repositories. Achieved 90% accessibility on Page Speed Insights.
- Delivered an intuitive user experience, and gained 66% Lighthouse performance scoring.

### Portfolio project

[GitHub, HTML5, CSS, JavaScript] • April, 2023

[Portfolio](#), [GitHub](#)

- Created a multipage portfolio site, from conceptualization to development and deployment.
- Organized optimization of images within the portfolio site, helping to reduce loading time by 25%.
- Operated HTML, CSS, and JavaScript, receiving a 94/100 score on Google Page Speed Insights.

### Mimino project

[Git, GitHub, Vite, HTML5, CSS, JavaScript] • March, 2023

[Mimino](#), [GitHub](#)

- Collaborated closely with the team to craft a responsive website layout that enhances user experience and engagement.
- Implemented front-end features using Vite Bundler and HTML, CSS, and JavaScript, ensuring functionality and 97% effectiveness on Page Speed Insights.
- Acquired a responsive design that adapts fluidly across various devices, contributing to a user-friendly interface. Reached 79% accessibility on Page Speed Insights.

### Weather app project

[GitHub, HTML5, CSS, JavaScript, AXIOS, Rest API] • March, 2023

[Weather app](#), [GitHub](#)

- Delivered a user-friendly and intuitive weather app, resulting in a 93% Lighthouse performance score and 92% accessibility.
- Used a skillset encompassing GitHub, HTML5, CSS, and JavaScript to construct a feature-rich and visually appealing application.
- Leveraged AXIOS to facilitate seamless communication with a Rest API, enabling real-time weather data retrieval and display.
