Junior Full-stack Web Developer

Aspiring developer with 10 months of intensive training in HTML, CSS, JavaScript, React, and Node.js. Completed over 1,000 hours of coursework, including three team projects and 43 individual tasks. Eager to apply acquired skills within a collaborative team environment and contribute to website and application development projects.

Project Experience

PowerPulse project

[Express.js, Node.js, MongoDB, Mongoose, SCSS, JWT, Webpack, Redux, React] • November, 2023

PowerPulse, GitHub
- Collaborated with a diverse team to ensure seamless functionality and user experience.
- Created a single-page application for monitoring sports activities and making notes.
- Achieved results, including a 79% accessibility rating on Page Speed Insights and a 98% Lighthouse performance score.

Cinemania project

[Git, Parcel, HTML5, CSS, JavaScript, AXIOS, Rest API] • June, 2023

Cinemania, GitHub
- Collaborated with a team to create a dynamic, multipage website for movie searching and watching.
- Developed website features with HTML, CSS, JavaScript, and GitHub repositories. Achieved 90% accessibility on Page Speed Insights.
- Delivered an intuitive user experience, and gained 66% Lighthouse performance scoring.

Mimino project

[Git, GitHub, Vite, HTML5, CSS, JavaScript] • March, 2023

Mimino, GitHub
- Collaborated closely with the team to craft a responsive website layout that enhances user experience and engagement.
- Implemented front-end features using Vite Bundler and HTML, CSS, and JavaScript, ensuring functionality and 97% effectiveness on Page Speed Insights.
- Acquired a responsive design that adapts fluidly across various devices, contributing to a user-friendly interface. Reached 79% accessibility on Page Speed Insights.

Weather app project

[GitHub, HTML5, CSS, JavaScript, AXIOS, Rest API] • March, 2023

Weather app, GitHub
- Delivered a user-friendly and intuitive weather app, resulting in a 93% Lighthouse performance score and 92% accessibility.
- Used a skillset encompassing GitHub, HTML5, CSS, and JavaScript to construct a feature-rich and visually appealing application.
- Leveraged AXIOS to facilitate seamless communication with a Rest API, enabling real-time weather data retrieval and display.

WebStudio project

[GitHub, HTML5, CSS, JavaScript] • March, 2023

WebStudio, GitHub
- Designed and developed a responsive website layout using HTML5 and CSS to ensure optimal viewing on various devices.
- Implemented interactive features with JavaScript to enhance user experience.
- Managed version control and collaboration using GitHub, ensuring clean and trackable code throughout the project lifecycle.
